SKILLS

I build responsive web pages , learn work very fast, capability to produce and am also good at working with a team.

EXPERIENCE

Web Development

2 years experience

- Programming skills and languages : js , css , html , php , mysql, React.js, Bootstrap , git-hub, problem solving, Jira Scrum.
- Very Good at : oop , React js : router Hooks , rest api : Axios fetch, redux and redux toolkit thunk middleware, Next js .

My graduate project

January 20 - March 15 - 2022

- The project is for programmers, they can do quizzes to determine their level in a programming language .
- I made the work plan, home page , admin dashboard, exam page , log in ,sign up, ajax requests and some php functions, With Success Rate 83%.

Frontend projects

1. Full responsive Template with bootstrap here.
2. Simple Ecommerce App here. main concepts : react router V6.8, reusing components, Hooks , fetch api , state management; github repository Repo .
3. Simple react gaming app for tranning on react. main concepts : router, reusing components, props , iclouding bootstrap, responsive design, published on github here

    github repository Repo .

4. Crud books app with React for training on redux toolkit thunk middleware (not deployed yet cuz I did not find a books api, but I use json server at port 9000 if you wanna try it)   github repository [Repo](#) .
